FACILITIES, GENERAL.

(a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

There are galvanized metal pipes used in the construction of the serval enclosure. Some of these pipes have rusted through and need to be replaced. The facility is in the process of rebuilding the enclosure and has plans to change these to a heavier metal.
